# Mines and Prospects--Furnaces and Mills

# The Daly West to Have New Manager

Mr. Bamberger Retires From Posi tion With His Son to Succeed Him in the Saddle.

Not an interest whom this announce ment will reach but will regret that Jacob E. Bamberger has found it neces sary to retire from the management of the Daly West Mining company. Mr. Bamberger's retirement took place at the Bamberger's retirement took place at the recent meeting of the board of directors, to whom he pleaded that personal interests would not permit him to serve longer in this capacity. Since he took hold of the properties of the company he has made it possible for the company he has made it possible for the company to pay not less than \$4,00,000. Who his successor will be the board of directors is not yet prepared to announce. The hope is expressed, however, that it will be a servant as efficient as has been Mr. Bamberger. Nothing within his personal resources but has been expended in the interest of the company. Ernest Bamberger and Jasper McCeskell are each men of experience, and that the record of the past will be at least approximated, if not reproduced, local interests at least believe.

Mr. Bamberger is at this time in San Francisco, where he is pronagating another big proposition. To determine its merits he has Mr. Kirby, former superintendent of the Daly West, making an examination. No doubt his following will be as responselve as that which railied when he took charge of the Daly West. His record with this procerty has shown him a master miner, and not a man in Utah but hopes that its success will be reproduced in any enterprise that he may hanch. recent meeting of the board of directors

in any enterprise that he ma;

duced in any enterprise that he may haunch.

The question of who will he Mr. Bamberger's successor, as manager of the company will be decided at the next meeting of the board, the directors in the meantline refraining from any discussion of the topic. It was suggested during the afternoon that Mr. McCornlek might be ealled upon to exercise this function, but in reply to this he piended that it was impossible for him to do so. It is more than likely that Ernest Bamberger will be made the general manager. He knows the mine thoroughly, has been assistant general manager during his father's administration, and is, perhaps, the likeliest of many candidates who will undoubtedly seek the position.

#### DEER CREEK CANYON.

### Much Activity Now Visible in Country Around Marysvale.

In Deer Creek canyon an era of earness development has begun H. J. Gottfredgen, with a force of men, is pushing the necessary preliminaries to a vigorous campaign of exploration on the Gold Mountain Development company's fine property, says the Free Lance of Marysvale. Recently a consignment of rails, cars and other mining supplies was sent from Marysvale over to that fine property.

cars and other mining supplies was sent from Marysvale over to that fine property.

Word is received from Gold mountain that the improvements in the Annie Laurie mill have added largely to the convenience of handling the ore, and, therefore, have correspondingly reduced the cost of production.

At the Sevier mine and mill things are moving harmoniously toward the conditions where dividends will not only be 'in sight,' but will be a reality.

Sidney Black is in town from Deer Creek and reports that the tunnel on the Richfield Mining company's ground has pierced a three-foot vein of ore, and that everything looks fine and promising.

Superintendent B. T. Ashby reports the completion of the station near the face of the 700-foot Aledebaran tunnel and that the sinking of the winze on the ore chute is in progress.

is in progress

Conditions at the Log Cabin are in a state of "innecuous desustude." but we have the assurance from Superintendent Ole Larson that the old-time activity will soon be resumed.

## Gold Hunter Mines of Idaho Doing Some Business.

D. P. Rohlfing, who has just returned from the Gold Hunter mines in the Cocur d'Alenes in Idaho, is quite exultant over conditions there, and says that he will increase the earnings from that source here immediately, beginning the enlargement of the mill that he may put through its crushers not less than 500 tons of ore daily. At present the management of the property is sending some ore of fine quality to the furnaces of this valley, the settlement sheets showing the presence of 2 ounces in silver, with 50 per cent lead per ton. Under the direction of Mr. Rohlfing the Gold Hunter mines have opened up in a manner that justifies the owners in looking forward to a steady production, and dividends should begin next season. Of the Coeur d'Alenes in general, Mr. Rohlfing says they will perhaps close this season on a new record of production All the old properties are showing an increased output, while not a few of the youngsters are revealing some ore, with here immediately, beginning the enlargecreased output, while not a few of the youngsters are revealing some ore, with the prospect of finer quality than at any period in many years. The local interests are congratulating Mr. Rohlfing on the results that have been achieved by him in the Gold Hunter, and undoubtedly, under his direction, will begin the payment of dividends next year. Mr. Rohlfing leaves for the southern country the present week to inquire into developments in the property of the Lulua Mining company, adjoining that of the Horn Silver

## Silver Shield Strike.

While Harry Joseph, the manager of the property, pleads that he is not at this time ready to exploit it, a most interesting change is in progress over at the Silver Shield at Bingham. Mr Joseph admits this much, and reluctantly says that from the new development he is taking ore that will afford a good margin. The ledge, where he has broken into it, shows strong width, and in it is occurring an ore of fine quality. The Shield ought to be among the large producers of Bingham next year. Certainly Mr Joseph is prosecuting a most intelligent campaign, and his results ought to be such as to reward the shareholders.

## Ores and Bullion.

Ores and Bullion.

In the ore and bullion market the day's settlements amounted to \$57,900, McCornick & Co, reporting them as they follow: American buillon, \$39,700; gold bullion \$10,000; gold, silver, lead and copper ores. \$29,200.

In the metal market silver ruled at \$7% cents an ounce, lead at \$3,500,4.20 per hundred pounds, and casting copper at 12% cents a pound.

Toung & Fowler have moved. Now located in the new basement at 32 Main street, opposite Z. C. M. I.

#### THE DAY ON 'CHANGE.

#### The Market Generally Improved With Some Sprinting at Intervals.

The day on the mining exchange closed n the sale of 49,292 shares of stock, for which \$8871.55 was paid, and with conditions generally improved. The star among the traders was May Day, and while the shorts raided it at the eleventh hour and old it down to 15 cents, it rallied and closed on an advance of three-quarters of a cent. Con. Mercur exhibited much trength and without much effort moved up to 40 cents, while Yanke Con., that had dvanced the previous day on reports of most favorable nature, took a tumble and sold down to 3514 cents. Sacramento, which will make its reappearance among the dividend-payers next month, was in active demand, while Carlsa moved up to 104 conts, the day closing on the follow-

## Boston Coppers Boom.

Special to The Tribunc Special to The Tribune.

BOSTON Mass., Oct. 11.—Copper shares started this morning with a whirl and early prices were strong and active, nearly everything on the flat taking a hand in the movement. Commission house brokers were exceedingly busy, while traders were making the best of the active market. The trend continued upward during the greater part of the day, but in the afternoon when traders tried to realize there were found to be few buy, ing orders and the market reacted somewhat. This, however, is only to be expected after the recent sharp advance. The feeling is still good. Hornblower & Weeks, brokers, 53 State street, Boston, and 19 Wall street, New York, furnish the fellower them.

### STRIKE BY UTAH MEN

## Two Feet of Solid Ore in Fissure Vein Going \$28 a Ton.

Special to The Tribune. CALIENTE, Nev., Oct. 11 .- Levi Syphus of Panaca returned to Caliente today with a sack of samples of free gold and lead-copper ore taken from two groups of mines, the Mar-guerite and Winona, located about eighteen miles south of St. Thomas, on the Virgin river, and about fifty miles from Moapa, on the San Pedro rail-

The groups are owned by Mr. Syphus and R. C. Lund. Ed Brown and Frank Burgess of St. George, Utah, and Syphus. Gentry of Moapa and Rassum of California.

They consist of sixteen claims and have fixing a superstantial and have fixing a superstantial and seven services between granite and

They consist of sixteen claims and have fissure veins between granite and shist walls, and there are two feet of solid ore, 1000 pounds of which went \$28 per ton. The quartz is silicious, honey-combed, carrying lots of hematite of iron and free gold. The lead-copper properties show over 50 per cent lead and good values in copper. They have completed about 300 feet of work and have struck a fine chimney of high grade lead-copper ore on ney of high grade lead-copper ore on one of the claims. The ledge on this claim is fully four feet wide between

Three miles below St. Thomas on the lower end of the Muddy valley, is a deposit of rock salt, 160 acres, showing by a conservative estimate 1,000,000 tons of alt, ninety-nine and three-fourths pure above ground.

This salt took the first prize at the world's fair in 1903. This is the largest pure salt deposit in this country and is owned by Lewis Syphus and his

Five miles above St. Thomas in the West hills in the Muddy valley, these gentlemen have 220 acres of magnesian clay, over 100 feet thick, owned by clay, over 100 feet thick, owned by Lewis Syphus and brothers, Clapp and George of Los Angeles, and J. E. Harper of Chicago. Actual analysis of this deposit shows it capable of being manufactured into the finest cement, fire clay, pottery and chinaware, and its supply is immense. If a branch road from Moapa were put into this district the sait and clay shipments, to say nothing of ore which could be hauled to the San Pedro, would furnish a tonnage which would add millions of dollars to the treasury of the railroad company. Mr. Syphus gave The Tribune representative samples of ore equal une representative samples of ore equal in richness to any of the same class ever brought to Callente.

The Callente Progress made its appearance today and is a credit to the camp and its energetic proprietor, W. I., Dunne.

# A New Table for Bingham Mines

Ores in the Big Camp-Col. Wall Has Fine Method.

A new table, improvised by Col. Enos A. Wall, is not unlikely to revolutionize methods employed in the reduction of low-grade ores at Bingham. To demonstrate this the Colonel has a table under construction of one of the local manufacturers, this to be introduced in the Dewey mill. Bingham Canyon, the last of the week. It is the intention of the Colonel to reduce the ores of the Kempton mines in the plant and to elucidate a principle hitherto unthought of in Bingham. Upon this method he has been engaged for a long time. His tests have satisfied him that big results may be accomplished upon low-grade ores. What the principle is the Colonel, who was interviewed during the day, declined at this time to disclose. He pleads that it is as yet experimental, and while he has every confidence in the results that await him he is not yet prepared to take the world of metallurgy into his confidence. Biticked out in the Kempton mines are great volumes of ore that, with efficient treatment, should become a source of big revenue to the Colonel. Of course the mines are tied up in litigation, and if the Federal court would look after its duties as diligently as our local interests a hundred men will be added to the payroll in a short time.

General Metals Company in Trouble.

General Metals Company in Trouble. COLORADO SPRINGS, Colo., Oct. 11. -Judge J. H. Lunt, representing local creditors of the General Metals company, has left for New York to argue before the United States court there a motion to transfer the action in bankruptcy against the company to this State in which are the most and largest creditors. General Manager Grant of the Telluride mill, belonging to the company, has received a message from President Finney stating that a move-ment is on foot to reorganize the com-pany and pay off all debts except those of stockholders and to resume opera-tions at the Colorado City plant. A meeting of the company with this pur-pose in view will be held in New York on Wednesday.

## West Dip in the East.

The United States Investor, replying to a query, says

A report on the West Dip company appeared in our issue of May 7, 1994. The officers of this company are prominent business men in Salt Lake City. They have been operating for two years or more from the west side of the Oquirrh mountains. The tunnel is being run to tap the whole property at a considerable depth and has now been extended a distance of 300 feet. No ore has been encountered yet, nor do they expect any for several hundred feet yet. A new power plant has just recently been installed and the work on the tunnel will be pushed forward with three shifts per day. The treasurer of the company says that there are no debts and that the company has money in the treasury. The United States Investor, replying to

## Making Good Way. Up at Bayhorse

The Camp Registering Good Returns From the Mines of That Productive Region.

James McGregor, who has been inquiring into his mining interests at Bay Horse, Idaho, came down from the north yesterday morning after inaugurating a campaign of development that will continue throughout the year. The proptinue throughout the year. The properties generally known as the Pacific group, although they are operated by the Salmon River Mining company, show some very good ore at this time, and promises to become quite productive next year. Mr. McGregor, who has long been identified with that region, is now shipping some ore of very good quality. Of the properties owned by O. J. Sallstury and associates, he says that their closing down at the present time is owing to the fact that Eastern investors are underinking their purchase, along with others. The Bay Horse mines show a considerable higher grade ore and under economic management should be
